# Import and Export

By Sarah Dixon

FBS Technical Support Manager

Import Module Types

1. Feed Mill/Commercial Mill
2. Packer
3. TA+
4. Breeder

Feed Mill vs Commercial Mill

Feed Mill

▶ Brings Feed tickets into SF

▶ You match feed, rations and locations on ticket to ingredients, rations and locations in FBS

▶ Limited to one mill

Commercial Mill

▶ Brings Feed tickets into SF

▶ Creates an A/P, A/R or Journal Entry for TA+ entries as well

▶ Can have multiple mills

▶ Some interfaces with mill programs maps ingredients and locations for you

Mills Currently Supported

Commercial

1. Illini Feed
2. Land o Lake
3. Feed Mill Manager
4. Agris
5. Ag Serv
6. Sudenga
7. Ag Tronix
8. Hubbard
9. Farnhamville Coop
10. Mid State Coop
11. Oakland Feed
12. Farm Service Coop
13. United Feed
14. Riverland Feed
15. Alpha FS
16. Agvision
17. Feed Office Pro
18. Ag Vantage
19. MFA ALma
20. Quick Book Invoices
21. Heartland Coop
22. Advanced Sales Analysis

Feed Mill

1. Easy Systems
2. Pig Champ
3. All American

Steps for import

- ▶ Have mill file on your computer
- ▶ Tell program where to look for it at
- ▶ Set your date range
- ▶ Map your Ingredients, rations and locations
- ▶ Set your options
- ▶ Transfer
- ▶ Run a Ticket Ration Report to double check everything

Packer Interface

- ▶ Brings in the sales information and can create an A/R
- ▶ Current Packers Supported
  1. Standard Packer
  2. Hog Inc
  3. Farmand
  4. Hormel
  5. America's Best Pork
  6. Tyson
  7. Hatfield
  8. Indiana Packer
  9. Excel/Cargill
  10. Swift
  11. Pig Pro
  12. Triumph
  13. Carolina Pride

- ▶ Same process as feed
  - ▶ Save file to your computer
  - ▶ Tell program where it is
  - ▶ Set Dates
  - ▶ Map traits
  - ▶ Set options
  - ▶ Transfer
  - ▶ Check you're A/R's

TA+ Import Routine

- Helpful when first setting up, can bring in excel files of your vendors, ledgers, locations, fields or at start of new crop year
- Can bring in large amount of transaction data compiled in excel
- Steps
  - Compile Excel file
  - Save to computer and tell program where it is
  - Map columns
  - Transfer
  - Check data
- Tips:
  - Look at the columns it will be asking for and base excel headings off of that
  - Consult the regular setup section for numbers associated with FBS fields
  - Make sure to save in an excel format compatible with FBS such as Excel 5.0 or 4.0- saving as a newer type won't work
  - Must be exact with ledger numbers, vendor names, etc.

Bottom Line: Almost anything can be imported if it is excel, csv or text format, it just might take a little work on our end and patience on yours!

Exporting

▶ Most Setup Files and all reports can be exported

▶ They will have an export button at the bottom, you can use that or send it to the clip board to paste into excel by clicking F11 on Keyboard!
